github.com/codesbysaravana | linkedin.com/in/saravanapriyanc | Portfolio

Skills

Languages: Java, JavaScript, SQL

Backend & Web: Node.js, Express.js, React.js

Databases: PostgreSQL, MongoDB

Cloud & DevOps: AWS (EC2, ECS, Lambda), Docker

Work Experience

St. Joseph's Institute of Technology, Chennai

Apr 2025 - Oct 2025

AI Engineer and Project Coordinator - Nephele (College-sponsored, faculty-guided project)

- Built a voice-based conversational AI system for mock interviews, resume analysis, and general conversation using the Groq API, AssemblyAI, Deepgram, and OpenAI APIs, and coordinated a 7-member cross-disciplinary team integrating this with hardware built by ECE/mechanical sub-teams into a mobile robot platform.
 - Used weekly by 10+ students during interview prep season; demoed at AWS Student Community Day at St. Joseph's Institute of Technology 2025 to AWS representatives and Community Builders.
- Tools:** OpenAI APIs, Raspberry Pi OS, Groq, FastAPI, React.js, SQLite

Dexwox, Chennai

Feb 2025 - Apr 2025

Software Developer Intern

- Owned end-to-end authentication and dashboard module: built JWT-based login in Express (bcrypt password verification, token signing via jsonwebtoken) with the corresponding React/Material UI login and dashboard flow, translating raw Figma designs into responsive UI with no pre-exported assets.
 - Integrated an AI-based style feedback on the frontend (base64 image encoding, backend API calls, response parsing/display) while collaborating in a 5-person team (2 backend, 2 frontend, 1 designer) on a live client product.
- Tools:** React.js, Material UI, Node.js, Express.js, JWT, bcrypt, MongoDB

Education

St. Joseph's Institute of Technology, Chennai

Aug 2023 - Jun 2027

B.Tech. in Artificial Intelligence And Data Science

CGPA: 8.5/10

Relevant Coursework: Object Oriented Programming, Databases, Data Structures and Algorithms, Operating Systems, Computer Networks, Machine Learning, Information Retrieval

Project Work

- MicrOps Live | GitHub** : Solo-built MicrOps, a DevOps automation platform deploying projects via GitHub Actions/Jenkins into dynamically provisioned ECS Fargate containers per tenant. Independently diagnosed and resolved a 3-day ALB-to-ECS networking failure caused by security group misconfiguration, restoring traffic flow to production containers. Shipped an OpenAI-powered failure diagnostics feature and live build streaming via SSE, with Stripe billing and tenant-tagged infrastructure validated across concurrent multi-user sessions.
Tools: React, TypeScript, Node.js, PostgreSQL, Redis, BullMQ, Docker, AWS (ECS Fargate, EC2, S3, ALB, VPC), Jenkins, GitHub Actions, Stripe, OpenAI API
- PasumCholai Live | GitHub** : Built PasumaiCholai, an AgriTech platform enabling farmers to list products directly for buyers, removing intermediary commission costs. Developed a voice AI pipeline (speech-to-text → GPT-4o-mini → text-to-speech) with dialect-aware understanding via OpenAI prompt design, supporting accessibility for non-literate or low-connectivity users. Implemented backend services (FastAPI, MongoDB, EC2) and order/delivery coordination workflows as part of a 4-person hackathon team.
Tools: React.js, FastAPI, MongoDB, EC2, S3, OpenAI API (GPT-4o-mini), Mangum
- CodePro Live | GitHub** : Developed an online coding platform using React.js and Monaco Editor to support browser coding and execution workflows. Implemented backend code execution workflows using Judge0, BullMQ, and Redis to manage concurrent execution requests and reduce API throttling during high usage. Designed PostgreSQL schemas for coding problems, test cases, and tenant-based data separation for institutional usage.
Tools: TypeScript, Node.js, React.js, Judge0, BullMQ, Redis, PostgreSQL, Docker, PM2, NGINX

Leadership & Community

- AWS Student Builder Group Leader (2026–2027)** at St. Joseph's Institute of Technology
- AWS Community Day Event Coordinator** at St. Joseph's Institute of Technology

Awards and Certificates

- Oracle** Cloud Infrastructure 2025 Certified AI Foundations Associate (Apr 2026)
- Oracle** Cloud Infrastructure 2025 Certified Foundations Associate (May 2026)
