

Saravana Priyan C

c.saravanapriyan@gmail.com | +91 6383765537
github.com/codesbysaravana | linkedin.com/in/saravanapriyanc

Skills

Languages: Python, Java, JavaScript, SQL

Databases: PostgreSQL, MongoDB

Backend & Web: Node.js, Express.js, FastAPI, React.js

Cloud & DevOps: AWS (EC2, ECS, Lambda), Docker

Work Experience

St. Joseph's Institute of Technology, Chennai

Apr 2025 - Oct 2025

AI Engineer - Nephele

- Led the design and development of Nephele's conversational AI platform, defining user interaction workflows and coordinating implementation across voice, vision, and AI components.
- Managed the development of a QR-based attendance workflow, streamlining user identification and voice-based confirmation through automated data mapping and validation processes.
- Directed the integration of Gemma and Moondream models, defining routing logic for multimodal text and image processing while ensuring efficient system operation.

Tools: OpenAI APIs, Raspberry Pi OS, Ollama, OpenWakeWord, FastAPI, React.js, SQLite

SkyplerAI, Chennai

Mar 2026 - Dec 2026

Software Developer Intern

- Developed frontend workflows for the StitchPro platform using React.js, enabling users to upload clothing designs and receive AI-generated feedback and style recommendations through integrated backend AI APIs.
- Built a JWT-based authentication system using access and refresh tokens to support secure session management and stateless communication between frontend and backend services.

Tools: React.js, Node.js, Express.js, MongoDB

Education

St. Joseph's Institute of Technology, Chennai

Aug 2023 - Jun 2027

B.Tech. in Artificial Intelligence And Data Science

CGPA: 8.5/10

Relevant Coursework: Object Oriented Programming, Databases, Data Structures and Algorithms, Operating Systems, Computer Networks, Machine Learning, Information Retrieval

Projects & Product Development

- PasumCholai Live | GitHub** : Developed an AgriTech platform using React.js and Node.js that enabled farmers to list agricultural products directly for buyers without intermediary commission costs. Implemented order and delivery coordination workflows, and built telephony-based AI assistance features with multilingual and dialect to support users without internet access using AWS services including ECS Fargate, Lambda, and DynamoDB.
Tools: React.js, Node.js, FastAPI, EC2, S3, ECS Fargate, Lambda, DynamoDB
- CodePro Live | GitHub** : Developed an online coding platform using React.js and Monaco Editor to support browser coding and execution workflows. Implemented backend code execution workflows using Judge0, BullMQ, and Redis to manage concurrent execution requests and reduce API throttling during high usage. Designed PostgreSQL schemas for coding problems, test cases, and tenant-based data separation for institutional usage.
Tools: TypeScript, Node.js, React.js, Judge0, BullMQ, Redis, PostgreSQL, Docker, PM2, NGINX
- MicrOps GitHub** : Developed a web-based DevOps automation platform using React.js and Node.js to simplify Jenkins workflow creation through an easy to use interface. Developed Node.js backend using AWS SQS and Jenkins integrations to automate CI/CD builds and reduce manual configuration overhead. Created short-lived infrastructure provisioning using AWS S3 and CloudFormation to dynamically create EC2 build environments.
Tools: Amazon Web Services, SQS, S3, AWS CloudFormation, EC2, Jenkins, React, Node.js

Leadership & Community

- AWS Student Builder Group Leader (2026–2027)** at St. Joseph's Institute of Technology – Leading cloud and AI community initiatives, workshops, and industry engagement programs.
- Google Gemini Ambassador (2026–2027)** at St. Joseph's Institute of Technology – Promoting Generative AI adoption through technical sessions and student outreach.
- AWS Student Community Day Event Coordinator (2026–2027)** at St. Joseph's Institute of Technology – Coordinated speaker communication, event operations, attendee engagement activities.
- The Builder Protocol Organizer (2026)** at St. Joseph's Institute of Technology – Organized a 30-day industry speaker series featuring experts across Cloud, AI, DevOps, Security, and Architecture.
